They might be just wires to the average players, but they are an integral part of sound. Musical strings are the connection between the fingers and the instrument, so it is crucial to use the best material that can be obtained. We manufacture strings for all stringed instruments and our long history of expertise has allowed us to develop our guitar string range further.

Phosphor Bronze roundwounds are noted for their bright, open and stringy sound, in addition to very long life.

333 106	D	.059	Phosphor bronze roundwound on hexagonal steel core, lightly polished	20.0 kg	7.14 €

This set of strings was specially developed for resophonic guitars.

With the gauges .016, .019, .028w, .039w, .049w, .059w, the Cone (resonator) is pressed firmly into the guitars even with deep tunings and thus has no loss of sound. The wound bass strings minimize sliding noises and thus give the sound more sustain.

Round Core Phosphor Bronze

Phosphor bronze roundwound on round steel core

Round core strings feature a “round core” construction instead of the commonly used “hex core” construction found in today’s strings. This return to the manufacturing process of the Fifties and Sixties results in strings which offer unbelievable tone and sustain.

Round core strings must be wound with special care, with selected materials and certain techniques to get the desired sound results. Both, the material and the skilled production technique are responsible for the unequalled tone of these strings.

A Family Company through the ages

The history of PYRAMID string and tuning pipe manufacture

Foundation – A. Osmanek Musikinstrumenten- und Saitenfabrik was established in Schönbach, near Eger, in the former Austro-Hungarian Empire.

Anton Osmanek ran a weaving mill with 300 hand weavers. Due to the rapid increase in mechanisation, the hand weaving business was set to become extinct, so he changed to trading with musical instruments. Alongside the trade of musical instruments and accessories, he developed specialised silk based E strings, “the fifth”, for violins. Products which were of the highest quality and received numerous awards and certificates of merit over the subsequent years at various exhibitions and fairs.

The 1st World War then brought a sudden end to the successful business of exporting to the eastern countries and overseas markets. The successor – Karl Junger began to reorganise the company following the difficult times. He focused on the manufacture of strings for musical instruments.

The 2nd World War brought about the closure of the company as a non-vital industry. Following the end of the war the company was moved, under difficult circumstances, to Bubenreuth near Erlangen in Bavaria, Germany.

Restart in Bubenreuth 1948 in a barrack, then the 1st new factory building on the company's own ground about 1952/53.

2nd and 3rd building phases followed later in 1956.

The Challenge of rebuilding the company was undertaken by Karl and Norbert Junger. Their endeavours were supported well by the loyalty of countless domestic and overseas customers. Under the name of Karl Junger

Saitenfabrik the company expanded rapidly and during this period the tuning pipe manufacturer, Leopold Müller from Schönbach, was incorporated into the business.

PYRAMID today is recognised the world over for good quality and excellent service, exports to over 100 countries across the globe and is under the management of Max Junger.

Where does the name PYRAMID come from ?

Pyramid was developed from the former name used on the string packaging and subsequently became the registered Trademark PYRAMID for all our products. The graphic and word PYRAMID is a patented registered trademark in Germany and across the world. Patent Registration No. 613826/27.

Terms

Prices

Quoted ex factory in EURO. Consular fees will be charged to the buyer. An extra 100% is charged for strings of non-standard tunings or non-standard vibrating lengths. Strings not on this list can be custom-made at prices quoted upon request.

Delivery

Delivery dates are indicated to the best of our judgement, but without any obligation on our part. Unforeseen extraordinary events and influences beyond our control may cause delays and justify postponements in accordance with our possibilities.

Payment

Irrevocable letter of credit, cash against documents or in advance after receipt of our

Proforma-Invoice by sending us a cheque in EURO drawn on a German bank, remittance or by international money order.

References are requested, with the first order, of firms not yet known to us. The prices in this catalogue supersede all prices quoted previously.

Retention of title

We shall retain the title to the furnished goods until the payment in full of the amount of our invoice and of the other out-standing debits.

The place of performance and jurisdiction

is Erlangen/Germany for both parties.
